

A Telecommunications Services Company Saves Over \$1 Million with Log & Event Manager

Log & Event Manager has helped this telecommunications services company **identify and deal** with a major security incident: “We have identified an account which was given administrative capabilities by a mistake and was using those to modify systems group memberships.”

The company chose Log & Event Manager over competing solutions because of “Cost and simpler administration.”

Challenges

A medium enterprise telecommunications services company in Israel identifies **network security** as the most critical security area to their organization.

Demonstrates and meets **SOX** and **ISO 27001** regulatory compliance requirements with SolarWinds **Log & Event Manager**.

Use Case

- According to this telecommunications services company, the three most critical features that will help detect and respond to threats are:
 - Threat intelligence
 - Centralized real-time event detection, correlation & notifications
 - Identifying events by source country

Results

After deploying Log & Event Manager, the company:

- Detects over **500 security incidents** every month.
- Saved **\$1,000,001 – \$3,000,000** within the past 12 months.
- Reduced the occurrence of network/business downtime by **30% – 50%**.
- Their favorite feature is the ability to create **custom rules for real-time correlation**.
- The telecommunications services company now feels more prepared to deal with *security and compliance issues with Log & Event Manager*.
