

Case Study: A Large Healthcare Company Eliminates Inconsistent Patching with Patch Manager

“We use it for patching, and it does a good job.”

Challenges

- Inconsistent 3rd party patching using the existing Microsoft WSUS & SCCM solutions.
- Used time-consuming manual, in-house patch processes and Microsoft WSUS/SCCM prior to SolarWinds **Patch Manager**.

Use Case

- Manages with Patch Manager:
 - servers: 50-250
 - workstations (incl. notebooks): 1,001-5,000
- Pushes out > 50 patches per month with Patch Manager.
- Decided to purchase SolarWinds Patch Manager because of its **features**.

Results

- Patch Manager helps the healthcare company to:
 - Test and deploy patches without affecting business/IT productivity
 - Define and execute patch strategies for different user groups or computer groups
 - Adapt to changes rapidly for both physical and virtual environments
 - Do on-demand patching and creation of custom patches and packages
 - Quickly generate reports on patched and unpatched systems and software
- Patch Manager helps save 11-25 hours of patch workload each month.

About SolarWinds Patch Manager

SolarWinds delivers powerful, affordable, and easy-to-use IT security tools to help you monitor, patch, and eliminate security threats and vulnerabilities across your network. Get fast and easy compliance reporting for HIPAA, PCI, SOX, ISO, and more.
