

# Case Study: Pharmathen International

## Challenges

- Purchased SolarWinds LEM to address the following challenges:
  - Determine whether a security incident has occurred and what happened
  - Correlate logs and events from network devices, servers, and applications

## Use Case

- Collects log and event data from between 0 and 100 nodes.
- Collect logs and events from the following devices:
  - Servers
- Collect log and events from the following applications:
  - Operating System Events
  - Infrastructure applications; e.g., DHCP, DNS, Active Directory, etc.
  - E-mail servers
  - Antivirus software

## Results

- Realized the following benefits with SolarWinds LEM:
  - Find if a security incident had occurred and what happened
  - Troubleshoot application and network problems
  - Aggregate their log data in a single place
- Purchased SolarWinds over competitive vendors for the following reasons:
  - Being an existing SolarWinds customer or purchasing with other SolarWinds' products
