

Case Study: Educational Institution

“SolarWinds LEM was a single aggregate point for the log files we needed.”

“We could see in real-time files/directories and user authentication activity.”

Challenges

- Purchased SolarWinds LEM to address the following challenges:
 - Determine whether a security incident has occurred and what happened
 - Track user authentication

Use Case

- Collects log and event data from more than 5001 nodes.
- Collect logs and events from the following devices:
 - Servers
- Evaluated the following vendors before purchasing SolarWinds LEM:
 - BlueLance, Inc.

Results

- Realized the following benefits with SolarWinds LEM:
 - Find if a security incident had occurred and what happened
 - Aggregate their log data in a single place
- Purchased SolarWinds over competitive vendors for the following reasons:
 - Cost
 - Being an existing SolarWinds customer or purchasing with other SolarWinds' products
