

# SolarWinds Log & Event Manager Customer Review

5/5 Stars

How our organization uses SolarWinds Log & Event Manager:

“ My organization uses SolarWinds LEM to manage logs of a security nature in a single place, and provide actionable information, with the potential to deep dive on specific pieces of information.

Would you recommend SolarWinds Log & Event Manager?

“ I do recommend SolarWinds LEM because the pricing model is perfect for SMB, where volume-of-data pricing would place a SIEM outside the affordable range.
