

Serv-U Customer Review: Nick Yakich, Network Administrator, Engineering Systems Inc. (USA)

4.5/5 Stars

How our organization uses Serv-U:

We use **Serv-U Managed File Transfer (MFT) Server** along with **Serv-U Gateway** to securely and easily transfer files with our clients. Our old FTP server was not meeting the needs of our organization in terms of security and ease of use. People were resorting to other personal solutions such as Dropbox. Serv-U has allowed us to keep our file transfer services in house, and eliminate our usage of third-party tools.
