

Educational Institution Benefits from NOC View in SolarWinds Server & Application Monitor

“The NOC screen in SolarWinds Server & Application Monitor helps us pick up problems before they start to impact our users and customers.”

Challenges

- IT administration and management challenges that prompted you to purchase SolarWinds Server & Application Monitor:
 - Inability to identify why applications are running slow
 - Lack of visibility into application health and availability
 - Needed greater insight into performance metrics for troubleshooting
 - Too much manual effort and time spent on finding the root-cause of issues
 - Lack of centralized monitoring across multiple sites in the network
- Used custom scripts and home-grown tools prior to purchasing SolarWinds Server & Application Monitor.

Use Case

- Purchased Server & Application Monitor for the following key feature:
 - Its server monitoring and IT asset inventory management
- Applications primarily monitored using Server & Application Monitor:
 - Windows
 - Linux
 - SQL Server
 - Active Directory

Results

- **Identifies and troubleshoots application issues 80-100% faster** after deploying Server & Application Monitor.

About SolarWinds Server & Application Monitor

SolarWinds delivers powerful, affordable, and easy-to-use application, server, virtualization and storage monitoring software to help you get complete visibility of your systems infrastructure, and stay ahead of downtime and performance issues.
