

Cari-Med Ltd. Replaces ManageEngine with SolarWinds Server & Application Monitor

“The user interface is much better to read and understand. The solution shows real time data. It integrates well with applications, servers, and network devices.”

“SolarWinds Server & Application Monitor solves real world problems by assisting with monitoring and being able to make strategic decisions. This is a great product for monitoring your network / application and server environment.”

Challenges

- IT administration / management challenges that prompted you to purchase SolarWinds Server & Application Monitor:
 - Inability to identify why servers are running slow
 - Lack of visibility into application health and availability
- Purchased SolarWinds Server & Application Monitor to replace ManageEngine Applications Manager.

Use Case

- Purchased Server & Application Monitor for the following key features:
 - Its out-of-the-box monitoring templates for multi-vendor applications
 - Its application dependency mapping with underlying infrastructure using AppStack™ dashboard
 - Its server monitoring and IT asset inventory management
- Applications primarily monitored using Server & Application Monitor:
 - Microsoft Exchange Server
 - Windows
 - SharePoint

Results

- **Identifies and troubleshoots application issues 80-100% faster** after deploying Server & Application Monitor.
- Saw a **60 -80% decline in application and server downtime** since they started using Server & Application Monitor.
- **Realized ROI in less than a month** after buying Server & Application Monitor.
- Rates SolarWinds as 5 out of 5 stars.

About SolarWinds Server & Application Monitor

SolarWinds delivers powerful, affordable, and easy-to-use application, server, virtualization and storage monitoring software to help you get complete visibility of your systems infrastructure, and stay ahead of downtime and performance issues.
