Educational Institution Uses SolarWinds Server & Application Monitor for IIS Monitoring

"The in-depth dive into the IIS application pools gives a nice heads up. We were able to track down slow response time on web requests and IIS threads.

This is the solution to put your money into. The entire SolarWinds product line has greatly improved the insight into my network and server structures.

I have had zero issues with the usage or implementation of Server & Application Monitor."

Challenges

- IT Administration / Management challenges that prompted them to purchase SolarWinds Server & Application Monitor:
    - Inability to identify why applications are running slow
    - Inability to identify why servers are running slow
    - Lack of visibility into application health and availability
- Used custom scripts and home-grown tools before purchasing SolarWinds Server & Application Monitor.

About SolarWinds Server & Application Monitor

SolarWinds delivers powerful, affordable, and easy-to-use application, server, virtualization and storage monitoring software to help you get complete visibility of your systems infrastructure, and stay ahead of downtime and performance issues.
