Case Study: ALBtelecom Replaces Zenoss with SolarWinds Server & Application Monitor

Challenges

- IT administration and management challenges that prompted you to purchase SolarWinds Server & Application Monitor:
    - Lack of visibility into application health and availability
    - Needed greater insight into performance metrics for troubleshooting
    - Too much manual effort and time spent on finding the root-cause of issues
- Purchased SolarWinds Server & Application Monitor to replace Zenoss.

Use Case

- Purchased Server & Application Monitor for the following key features:
    - Out-of-the-box monitoring templates for multi-vendor applications
    - Server monitoring and IT asset inventory management
- Applications primarily monitored using Server & Application Monitor:
    - Windows
    - Linux
    - SQL Server
    - Oracle

About SolarWinds Server & Application Monitor

SolarWinds delivers powerful, affordable, and easy-to-use application, server, virtualization and storage monitoring software to help you get complete visibility of your systems infrastructure, and stay ahead of downtime and performance issues.
