Infinite Campus

Introduction

This case study of Infinite Campus is based on a March 2016 survey of SolarWinds Virtualization Manager customers by TechValidate, a 3rd-party research service.

Challenges

The business challenges that led the profiled company to evaluate and ultimately select SolarWinds Virtualization Manager:

- Purchased SolarWinds VMAN in order to solve the following virtual challenges:
  - Unable to be proactive in performance optimization
  - Capacity Planning

Use Case

The key feature and functionality of SolarWinds Virtualization Manager that the surveyed company uses:

- Manages >1000 VMs with SolarWinds VMAN.

Results

The surveyed company achieved the following results with SolarWinds Virtualization Manager:

- Purchased SolarWinds VMAN over other virtualization tools for the following reason(s):
  - Integration with other SolarWinds products
  - Alerting/Reporting
- Saw value in 1-4 weeks after deploying SolarWinds VMAN.
- Took the following amount of time to troubleshoot virtualization performance issues per month:
  - Before deploying VMAN: 5 – 10 hours
  - After deploying VMAN: < 2 hours
- Experienced the following amount of downtime due to VM performance issues per month:
  - Before deploying VMAN: < 2 hours
  - After deploying VMAN: < 2 hours
- Reclaimed storage, CPU and memory due to sprawl reduction and better management with SolarWinds VMAN:
  - CPU: 25-50%
  - Memory: 50-75%
  - Storage: 25-50%
- Was able to delay a hardware or software purchase with SolarWinds VMAN.

Company Profile

Company:
Infinite Campus

Company Size:
Medium Enterprise

Industry:
Computer Software

About SolarWinds Virtualization Manager

SolarWinds delivers powerful, affordable, and easy-to-use application, server, virtualization and storage monitoring software to help you get complete visibility of your systems infrastructure, and stay ahead of downtime and performance issues.
