Case Study: The GBS Group Replaces Nagios with SolarWinds Server & Application Monitor

"Since I'm a visual person, the graphs, charts, and alerts in Server & Application Monitor were readily visible. We do a lot of monitoring of different types of equipment, and I found SolarWinds easy to setup and get going."

"Server & Application Monitor is a more comprehensive and intuitive tool than others that I've used like Nagios."

Challenges

- IT administration / management challenges that prompted you to purchase SolarWinds Server & Application Monitor:
  - Lack of centralized monitoring across multiple sites in the network
- Purchased SolarWinds Server & Application Monitor to replace Nagios.

Use Case

- Purchased Server & Application Monitor for the following key features:
  - Ability to modify or build new templates for custom application monitoring
  - Server monitoring and IT asset inventory management
- Applications primarily monitored using Server & Application Monitor:
  - Windows
  - IIS
  - SQL Server

About SolarWinds Server & Application Monitor

SolarWinds delivers powerful, affordable, and easy-to-use application, server, virtualization and storage monitoring software to help you get complete visibility of your systems infrastructure, and stay ahead of downtime and performance issues.
