

5/5 Stars

How our organization uses Stack Overflow for Teams:

Since we have been using it for a short time period I can't really say that my organization has changed but all the members acknowledge the value and the power of Stack Overflow for Teams for:

1. How someone is asking for questions
2. Where they can find it
3. And how to keep in mind that questions may be valuable for others so they should be using Stack Overflow for Teams for the future.

Would you recommend Stack Overflow for Teams?

I would recommend it for many reasons. The main ones would be:

1. Easy onboarding
2. Good integration with ChatOps like Teams
3. Source of knowledge and knowledge sharing
