

5/5 Stars

How our organization uses Stack Overflow for Teams:

Now many of our questions and answers are all in one place instead of having to search Slack to find a link to Confluence which might link to Google Drive. This helps everyone find answers to their questions and get unblocked faster.

Would you recommend Stack Overflow for Teams?

Yes – the question/answer format is great for capturing information that otherwise would be lost in a slack thread or a less-than-stellar Confluence search.
