

Verbrugge International Embarks on Effortless API Integration with Talend

Introduction

This case study of Verbrugge International is based on a November 2023 survey of Talend customers by TechValidate, a 3rd-party research service.

“We use Talend to retrieve data in an easy way through api-calls which could not be done with the old software our company had (SSIS)”

“The integration of all the different functionalities in one environment (Talend Studio) is one of the reasons why we choose Talend. Also the rightness of functionality and multi-platform was a big plus leading us to choose Talend. ”

Challenges

Verbrugge International moved from Microsoft Integration Services to Talend.

Use Case

The key features and functionalities of Talend that Verbrugge International uses:
