

5/5 Stars

How our organization uses The Skills Connection:

We used The Skills Connections as our consulting partner during our Gartner MQ and CC assessment. They worked with us before we received the Gartner’s welcome package until the final report was published. It was an eight month period of co-working, where we received far more from them than we ever expected to.

Would you recommend The Skills Connection?

Yes, strongly. Because they work as if they are a part of the team. At some point during our time together, they had more energy to fight for things in our favor than we had ourselves. And that is priceless.
