

In March of 2020, I reached out to Mineral with questions about furlough compliance and employee rights. This was a critical time for my business, as we needed to temporarily shut down our operations in order due to the global pandemic. Mineral provided us with the guidance to remain compliant and ease the difficult transition for our employees. Personally, this gave me peace of mind knowing that our actions were not only legal but in the best interest of our business and employees.
