

Large Enterprise Banking Company

Introduction

This case study of a large enterprise banking company is based on a February 2021 survey of Tripwire ExpertOps customers by TechValidate, a 3rd-party research service. The profiled company asked to have their name blinded to protect their confidentiality.

“Expert Ops has been a great resource through our Tripwire deployment and continued development. They always have answers for our questions and time to help. Our representative has been devoted to helping us get where we need to go.”

“I recommend Tripwire because they are a leader in the configuration change control space.”

Challenges

The business challenges that led the profiled company to evaluate and ultimately select Tripwire ExpertOps:

- To help meet and maintain compliance

Use Case

They leverage Tripwire ExpertOps for the following:

- Security Configuration Management (SCM)

Results

The surveyed company achieved the following results with Tripwire ExpertOps:

- Gained deeper visibility across entire infrastructure
- Obtained greater assurance that critical security controls are being maintained

Tripwire ExpertOps helped the survey company:

- Address critical security issues
- Address compliance needs

Company Profile

The company featured in this case study asked to have its name publicly blinded because publicly endorsing vendors is against their policies.

TechValidate stands behind the authenticity of this data.
