

# International School Of London – United Kingdom

## Introduction

This case study of International School of London is based on a July 2016 survey of Xirrus, Inc. customers by TechValidate, a 3rd-party research service.

“Higher density and better throughput supported by Xirrus have allowed us to better place the APs without the need for major wiring investment.”

## Challenges

The business challenges that led the profiled organization to evaluate and ultimately select Xirrus, Inc.:

- Challenges faced before implementing Xirrus:
  - Being unable to support large numbers of devices at once

## Use Case

The key features and functionalities of Xirrus, Inc. that the surveyed organization uses:

- Xirrus solutions currently being used:
  - Fixed 2 radio Access Points (APs)
  - Fixed 4 radio High Density APs
  - Modular 2 to 16 radio High Density APs
  - Outdoor APs
  - Application Control
  - Cloud-based Xirrus Management System
  - On-premise Xirrus Management System
  - EasyPass portals
- Xirrus adaptive technologies currently being used:
  - Increased Wi-Fi capacity by using 4-, 8- and 16-radios in a single AP
  - Newer radios in Modular APs
  - EasyPass portals for guests, visitors and/or employees
- Used Cisco before switching to Xirrus.
- Top reasons for choosing Xirrus:
  - The scalability to support high user densities
  - Ease of deployment & management
  - Solution longevity with adaptive technologies

## Results

The surveyed organization achieved the following results with Xirrus, Inc.:

- Benefits achieved with Xirrus:
  - Increased network availability
  - Increased number of devices supported on the network

### Organization Profile

Organization:  
**International School of London**
